

Write my essay for me

Entering the university from the Ivy League and getting full funding - for many Russian graduates it used to be a pipe dream. However, now their dreams can come true. After all, there is an online school that prepares for admission exams and gives 100% guarantee of admission. And I am proud to have organized it myself.

The idea has matured at me for a long time already. The matter is that I myself studied at Columbia University, I understand, how exactly it is necessary to prepare, on what the admissions committee pays attention. And all knowledge I had to collect in pieces. At that time, there was no unified database where you could find all the necessary materials, special consultants or teachers. I myself made a list of suitable institutions, searched their websites for information, combined disparate data on exam preparation and essay writing, and ordered textbooks from America. But my efforts were successful. I not only got in, but also secured funding from the university, so I did not have to pay for my studies. In parallel with my own admission to Columbia University, I tutored, gave individual classes in English, advised on admission to U.S. universities, and as a result, all my students became students of American universities. No one else has such results in Russia. In general, the niche was absolutely untapped.

When I studied in the United States, I decided to analyze the criteria by which universities select students and decide on funding. I had more than 100 interviews with representatives of admissions commissions of the most prestigious American universities, analyzed a huge number of successful essays of applicants and solved the secret of a successful application. After that I decided that I would help more people to fulfill their dreams and get education in America. It was clear that it was impossible to train hundreds and thousands of people personally. So first I made a video course on TOEFL preparation and placed it on the Udemy platform. It took about 4 months to shoot it and the whole preparation process. Almost immediately after I posted the course, it became a bestseller. As a result, I started earning about \$1500-2500 per month on it. It was a passive income because the platform took over all the tasks of promotion and advertising. However, they took 50% of all the income received. At the same time, Udemy put the price for the rate only 10 dollars, so I got only 300 rubles from 1 sale. Thus, I was able to earn only because my rate was very popular and received a huge number of positive reviews. I realized that there was a great demand for my product. So I decided to make an online school on my own platform.

It took me about 4 months and 758 thousand rubles to create it. Most of all I had to spend on equipment - macbook, iPad, camera, tripod, lighting fixtures, microphone, background... The technical equipment took 325 thousand rubles in total. For various services on website creation, webinars, courses placement it was necessary to pay 120 thousand rubles. Advertising costs amounted to 146 thousand rubles, most of all we invested in the ads in the installation and Facebook, and shot a beautiful video in Malibu. Another 167 thousand rubles was spent on contractors (smm-manager, marketer, installer, designer). However, all these expenses not only paid off after the first webinar, but also allowed me to earn from above 1 million 37 thousand rubles. The business paid off instantly. During the first month 17 people enrolled in the school.

So, what is the Study America online school? It is a full support of admission to the leading American universities for a Bachelor's degree with 100% guarantee. The program is designed for an average of one year, students receive a course of 24 modules. They know how to make a balanced list of universities, prepare for all parts of SAT/GRE, successfully pass TOEFL, correctly fill out applications for universities, write a "killer" essay, collect recommendations from teachers and

employers, prepare for interviews, get funding.

Study America is a unique school. To date, it has no analogues. There are several agencies that also promise to help you apply, but they do not work with prestigious universities. In addition, they do not help to obtain funding from the university, because they receive a commission on the amount a student pays to study.

Also, our advantage is a 100% guarantee of admission. If a person successfully completes all of their homework, and follows all of our recommendations, they will definitely become a student at a U.S. university. Otherwise, we leave him/her in the program for another year free of charge. However, for all the time that I am preparing applicants, everybody entered the program from the first time. It is my deep expertise and extensive experience that allows me to give this guarantee. Studying at Study America online school gives me an understanding of how to write a "selling" essay using my method. All details are taken into account.
